

# 15kW Communication Power Supply Cabinet Distributor

## Overview

---

What is a power supply cabinet?

Our power supply Cabinets are designed to protect your critical equipment from power surges and voltage spikes from the toughest operation condition. Our distribution cabinets can be made from materials such as Aluminum, Steel, or Stainless Steel. We provide a variety of outdoor power supply cabinets to meet the needs of different industries.

What is a sm15k power supply?

The SM15K Series offers programmable DC power supplies with high efficiency, stability, and flexibility. Its constant power output significantly expands the voltage and current range compared to traditional power supplies. Programming is simple via the front-panel UI, web interface, or Ethernet.

How does Delta sm15k work?

The SM15K series features true bidirectional power flow, allowing it to absorb 100% of the power and operate symmetrically across both quadrants. Voltage and current are fully programmable from zero to maximum. Delta's innovative Power Regeneration Technology achieves up to 95% efficiency by returning full power to the grid.

What makes Delta Elektronika sm15k a good power supply?

Delta Elektronika continues its tradition of delivering reliable, low-noise, and energy-efficient power supplies. The SM15K series exemplifies these qualities, offering bidirectional power flow, flexible output, a user-friendly web interface, and plug-and-play connectivity.
