

Astana solar station

Overview

What is Astana solar?

Astana Solar is a member of Astana - Zhana Kala special economic zone. Project capacity - 50 MW per year. Expansibility - up to 100 MW per year. The plant of photovoltaic panels has modern automated European equipment meeting the highest standards of safety and environmental standards. Manufacturer's workshop warranty - 10 years.

Is Astana a good place for solar energy?

Astana, Kazakhstan is a decent place for year-round solar energy generation but it's not the best. The amount of electricity produced by solar panels varies throughout the year.

Who is Astana solar LLP?

Astana Solar LLP is a subsidiary of NAC Kazatomprom JSC implementing the project "Production of photovoltaic modules with the use of Kazakhstani silicon "KazPV". On December 25, 2012, during the visit of the Head of State to the plant, start-up and commissioning works were launched, the first Kazakhstani photovoltaic module was produced.

Where should solar panels be mounted in Astana?

To get the most out of your solar panels throughout the whole year in Astana, they should be mounted at an angle facing towards south at about 44 degrees from horizontal level. This orientation helps maximize their exposure to sunlight over all four seasons.

Astana solar station
