- ✓ BRAND NEW ORIGINAL
- ✓ HIGH-EFFICIENCY

Overview

Belize's emerging storage market offers unexpected advantages for nimble operators: But here's the catch—success requires deep understanding of Belize's dual energy economy. While resorts demand 99.9% uptime, rural cooperatives prioritize affordability over peak.

Belize's emerging storage market offers unexpected advantages for nimble operators: But here's the catch—success requires deep understanding of Belize's dual energy economy. While resorts demand 99.9% uptime, rural cooperatives prioritize affordability over peak.

Washington, D.C., February 5, 2025 - The Government of Belize, in partnership with the World Bank and the Government of Canada, announced the launch of a new energy project aimed at strengthening the country's power supply and improving the reliability of its electricity services. The \$58.4 million.

Belize's leading utility BEL is currently testing containerized storage units that can be redeployed within 48 hours of storm warnings. Belize's emerging storage market offers unexpected advantages for nimble operators: But here's the catch—success requires deep understanding of Belize's dual.

Belize, a country famous for its pristine rainforests and coral reefs, is now making waves in the energy storage industry. With 62% of its electricity already coming from renewables (mostly hydropower), this tiny nation punches above its weight. But here's the kicker - solar and wind energy don't.

Belize Electricity Limited (BEL), in partnership with the Government of Belize and with funding from the World Bank, continues to work diligently on deploying a 10 MW Battery Energy Storage System (BESS) in San Pedro Ambergris Caye. The project will be developed at BEL's property behind the BEL.

Average cost of electricity in 2020 (BZ\$/kWh). Power demand expected to triple by 2040, Belize committed to reach 75% Renewables in its Energy Mix by 2030 (50% today): "imperative and urgent to scale up Renewable Energy and modernize grid infrastructure using battery storage." Belize has.

first quarter of 2027. BEL seeks to add this 20MW/80MWh of battery energy

storage capacity by March 2025. The accelerated project timeline is necessary to help mitigate the current and continuing risk of capacity shortages due to the sharp increases in-country demand which has exceeded available.
