Most industrial off-grid solar power systems, such as those used in the oil & gas patch and in traffic control systems, use a battery or multiple batteries that need a place to live, sheltered from the elements and kept dry and secure. This place is called a "battery enclosure", or what is.

Sunwise Power & Battery Battery Enclosures are available in various sizes and configurations for housing batteries and support equipment, engineered specifically for the PV industry but suitable in a wide variety of applications. Most of our enclosures are designed to NEMA3R and rated for outdoor.

Heavy batteries demand a solar battery box with extra strength and durability. In order to protect outdoor batteries from weather and damage, Bison Profab manufactures custom NEMA 3R enclosures. Solar batteries require certain conditions to maintain their productivity and also require air flow.

NAZ Solar Electric carries high-quality racks and enclosures for your batteries. We stock a wide range of sizes to fit your specific needs. We carry racks and enclosures from a number of manufacturers such as Simpliphi, Outback, and Midnite Solar. Shop our selection to find the one that right for.

An outdoor battery cabinet is important for keeping batteries safe. It protects them from bad weather and temperature changes. This helps your solar system work better and stay safe longer. Research shows that good battery storage lowers the chance of damage or fires. Picking a cabinet with UL 9540.
