## Overview

---

Are energy storage projects a meter utility scale project?

The majority of new energy storage installations over the last decade have been in front of the meter utility scale energy storage projects that will be developed and constructed pursuant to procurement contracts entered into between project developers (or a special-purpose project company owned by such developers) and the utilities.

What are the different options for energy storage projects?

In each case, there are a number of different options and alternatives. When developing an energy storage project, a project owner can engage an EPC contractor to provide a fully-wrapped EPC agreement that will encompass the procurement, installation, and commissioning of batteries.

What is station use energy?

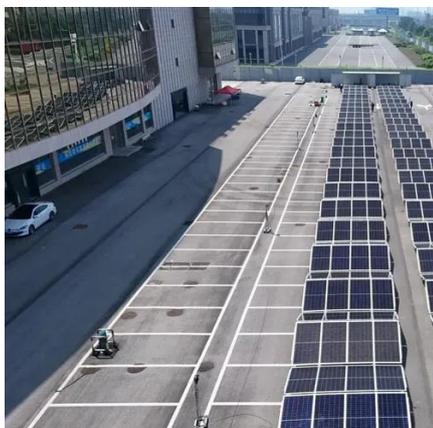

Station Use “Station use” energy refers to energy that is required for the operation of an energy generation or storage resource in order for such resource to operate. For certain types of resources, the station load can be significant.

Are energy storage PPAs a tolling arrangement?

Energy storage PPAs are often tolling arrangements because developers will not want to assume the cost of electrical energy input into a project and utilities are almost always in a better position to bear that risk.
