Sweden installed 430 MW of solar in the first half of 2025, with industry group Svensk Solenergi noting slower growth than last year but rising interest in battery storage driven by green tax deductions for households. Sweden deployed about 430 MW of solar during the first half of 2025, according.

We are both proud and very pleased to see one of our battery projects, developed entirely in-house, now being realized. The 10 MW (18 MWh) battery project in Södertälje, Sweden, was sold to Nordic Solar in December 2024 and is currently being constructed by Soltech Group. From the signing of the

a country known for winter darkness and ABBA is now leading Europe's renewable energy race. Sweden's energy storage photovoltaic projects are turning heads globally. Why?

Because they've cracked the code for 24/7 clean energy —even when the sun plays hide-and-seek. Let's unpack how this Nordic.

OX2 secures permit for 110-MW solar park in Sweden, eyeing battery storage to power 25,000 homes by 2027, advancing Sweden's fossil-free electricity goal.
