

UK Network Cabinet 380V Inquiry

Overview

Which cabinets are IP rated?

If you need to specify a bespoke IP rated cabinet, the Double-Skinned Cadet™ offers insulated protection in heights up to 2000mm. Its marine grade stainless steel option offers optimum performance in the most extreme environments. Take a look at the full range of steel enclosures and cabinets.

Which 380V AC rated device should I use?

If a product is to be used in mainland Europe or Irish Republic a 380V AC rated device is ideal, but either 380V AC or 400V AC products can be used with confidence. Visit our community and get advice from experts and peers on this topic and more.

Are industrial cabinets IP56 rated?

Available in five standard sizes, the industrial cabinets can be supplied with ventilation or without for IP56 rated protection. These IP rated enclosures have double skinned insulated walls and roof providing weather resistance, and a reinforced double skinned insulated door to provide optimum protection.

Can a 415V AC supply be a 380V AC?

For instance a 415V AC supply can rise to as high as 439.9V AC and still be within tolerance, but the maximum assured rated voltage for a 380V AC product is only 418V AC. A 380V AC supply can drop as low as 357.2V AC within tolerance but the minimum assured voltage for correct performance of a 415V AC product is 373.5V AC.
